Premium & Practical Engineering Transformation Solutions

kArandhamin Consultancy
Solution Alchemist

Design & Development

Start it right...

In most of the cases when a new product has to be designed, inputs from market survey are varied in nature and non-concluding because the end user doesn't know what they will get as product or service. As well as an old product requires continual improvement to sustain in market. We serve industry for both the cases, but not limiting to them.

Production Engineering

Do it correctly from first time...

Essentially, all elements of a production system have to be well thought and balanced before going to any market. We observe much of imbalance & fluctuations on production floors. We are having solutions for such situations and also we take responsibility of implementing them.

Don't waste your time & resources anymore.

Industrial Engineering

All roads lead to productivity...

Our team is equipped with latest tools and techniques of Industrial Engineering for improving productivity & efficiency on all levels of an organization.

Whether an organization is planning to go for automation or having problems in order processing time or want to align their resources with changing operation scenario, we are here to support you.

Quality

Quality is free...

We are providing comprehensive solutions for Product & Service quality. Right from the Policy making to its implementation on ground zero level.

We are supporting organisations for developing culture of quality within organisation and beyond. It is supported by philosophy of **TQM** Total Quality Management System. Also support for different compliances required by them.

Manufacturing Excellence

Preparedness for better future...

We support organisations to achieve excellence in manufacturing by adopting our tailor made tool kits.

This is not only achieving excellence in quality but an all-round transformation and culture development.

Be ready today for **Industry5.0** & lead.

Production Planning

Time is priceless...

In every industry, Production Planning & Control is considered as Brain. We are giving solutions starting from scratch to refining with newer tools and techniques.

We have expertise in resource balancing & optimization, finite resource planning and forecasting techniques for achieving organisation's goals.

Industry Set-up

Do it yourself...

A comprehensive approach towards establishing an Industrial Setup right from Product / Service selection to site selection to plant design to Productionisation to market capturing, we are supporting new as well as conditioned entrepreneurs for this.

Making different Policies & adoptive Sustainability are key factors to work upon while we design a setup for you.
