SUSTAINABILITY

Reduce. Optimize. Sustain.

REDUCE

LESS WASTE. MORE VALUE.

We have only one home, our lovely Earth. It has limited resources. Continual exploitation and uneven distribution diluted them.

To save our resources, best possible and first to attempt solution is reduction of all kinds of waste in the system.

At *kArandhamin* Consultancy, we have devised tools and techniques which are enabling organization for Waste Mapping, making of Roadmap of Reduction and measure the savings for further improvement.

We take wastes very seriously and trace them down till their source. Whether it may be material waste or energy loss or Time inefficiency, their cost to company are huge.

We formulate a system which tracks wastes on continual basis, and quantify the cost of waste generated by the system.

Waste source may be from Design, Engineering, Machines, Material, Purchase process, Layout, vendors and even Higher Management etc. etc. A critical analysis will be performed.

OPTIMISE

OPTIMIZE. DON'T COMPENSATE.

Once identification of wastes and their sources are known, we are supporting organisations to optimize them through a system.

This system ensures waste reduction without compromising Quality & Reliability. It also improves overall efficiency & productivity of the business.

Findings from these activities will become base for circular economy model within organization.

Leadership defines whether sustainability is a slogan or a system.

SUSTAIN

PROFIT THROUGH RESPONSIBILITY.

We integrate sustainability into day to day operations.

Every SOP has to be changed with this new prospective. **ESP** (Environmental, Social & Governance) Model to be made and implemented up to lowest level. Our system will not stop after **ESP** implementation, it goes beyond that for achieving an embedded culture in the organization which ensures that every damn action performed will comply the sustainability policies, goals and objectives.

The system also measures overall performance on the basis of Triple Bottom Lines.

We design Sustainability Matrix & Reporting System for ensuring that system will work exactly what it meant for, day in day out.

We do help organization in maximizing 3R (Reduce, Reuse & Recycle) with necessary compliances and audits. We do support **SDG** in all respect and forms.
